## Styrenics Circular Solutions welcomes new member Greiner

---

- Styrenics Circular Solutions welcomes Greiner Packaging, one of the leading European plastic packaging manufacturers
- Forms part of SCS' drive to work together all along the value chain to fulfil the unique circularity capacity of polystyrene

[Styrenics Circular Solutions](#) (SCS), the value chain initiative to increase the circularity of styrenic polymers, today announced that [Greiner Packaging](#) joins the organisation.

Greiner Packaging is one of Europe's leading plastic packaging manufacturers in the Food and Non-Food sector, operating across 19 different countries around the world. They join fellow SCS members, including [COEXPAN](#), [ELIX Polymers](#), [Exiba](#), [INEOS Styrolution](#), [Repsol](#), [TOMRA](#), [Total](#), [Trinseo](#) and [Versalis \(Eni\)](#).

Jens Kathmann, Secretary-General of SCS, welcomed Greiner Packaging on behalf of all the members: "We are delighted that as 2020 progresses, our membership keeps expanding. We are so pleased to welcome Greiner Packaging, a company strongly committed to the circular economy and fulfilling the intrinsic capacity for recycling of polystyrene. They are already involved in a [chemical recycling project](#) with fellow SCS member Trinseo and we look forward to further circularity projects as SCS works together across the whole value chain."

Konrad Wasserbauer, Director Circular Economy of Greiner Packaging, said: "Our entire company is committed to developing sustainable plastics solutions for a functioning circular economy. Our SCS membership was a natural step for us to take, fully in line with Greiner Packaging's vision that sustainability and plastics go hand in hand. The truth is that polystyrene is highly recyclable even for food contact applications and thus has a crucial role to play in the circular economy. We look forward to working together to realise that vision."

### About Styrenics Circular Solutions

Styrenics Circular Solutions is the value chain initiative to increase the circularity of styrenics. The initiative engages the entire value chain in the development and industrialisation of new recycling technologies and solutions. It aims to strengthen the sustainability of styrenic products while improving resource efficiency within the Circular Economy.
